

As you are aware the Town of Carbonear is installing a new Pump house at the bottom of Bennett's Hill/Moore's Hill. This pump house provides water service to the following streets:

- Moore's Hill
- Bemister's Hill
- English Hill
- Beverly Road
- Coral Heights
- Tyre's Drung
- Bennett's Hill
- High Road North (west side)
- King's Hill
- Hiscock 's Lane
- Nicholl Place
- Captain Seth Osmond's Lane

When this pump house is put in service there will be an increase in water pressure in this area.

**PLEASE INSURE THAT YOU HAVE A WORKING PRESSURE REDUCING VALVE INSTALLED IN YOUR HOUSE**, as required by the National Plumbing Code.

If you do not have a working pressure reducing valve you should have one installed by Feb 16, 2018. The pressure reducing valve will control the water pressure in the pipes within your house. Failure to have this valve in place will allow higher than normal water pressure in your house system and may result in plumbing failures.

This will provide improved water service to the area.

If you have any questions, please contact Brian O'Grady, 596-3831, ext 223.
